

**ENERGY EFFICIENCY
SOLUTIONS
FOR YOUR BUSINESS**

COMMERCIAL KITCHEN EQUIPMENT

Food service equipment can be very energy-intensive. By purchasing efficient appliances, you could save a significant amount on your utility bill and improve your bottom line. Plus, you can get an instant rebate on qualifying equipment.

You can redeem rebates of up to \$1,500 per piece of eligible equipment instantly from select area distributors or submit your application after installment. *For complete information, see the following page.*

Energy-efficient equipment offers other great advantages. For example, ENERGY STAR® certified cooking appliances feature improved temperature uniformity and cooking times, boosting production rates. And compared to standard ice makers, ENERGY STAR® certified models harvest ice faster while conserving water.

More savings tips

- Track energy use to identify savings opportunities
- Create a schedule for cleaning and maintaining equipment
- Establish a startup/shutdown process for equipment
- Upgrade to a heat pump water heater
- Install demand-controlled kitchen ventilation
- Switch to LED bulbs and fixtures
- Install occupancy sensors

How to participate

City Light's kitchen equipment incentives are part of a regional program in partnership with Puget Sound Energy. For complete program information, including lists of qualified equipment, distributors and application details, visit pse.com/CommercialKitchens. Water conservation incentives may be available from the Saving Water Partnership. For details, visit savingwater.org/rebates.
